Marketers are now able to bring us features that let us buy a GIF without actually having to leave the page we're on.Q: Incorrect overload for 'Delete' I am trying to create a program that removes first and last element of an array. Everything is going well but I get an error at the deletion. Code: void deleteAt(int

*array, int pos) { int i, j; if (pos == 0) { j = 0; } else { j = array[pos-1]; for (i = pos; i < array.length; i++) { array[i] = array[i] + array[j]; } } }
The invention relates to a device for dispensing at least one substance into a tank and comprising a dispensing tube, which is located outside of the tank and is provided with a base for receiving an adapter having a dispensing tip. In the prior art, it is known to use a dispensing device having a tubular dispensing tube which is located outside of a tank containing a fluid, for example oil, having to be treated. This dispensing device is used to supply at least one of the constituents of the fluid into the tank. However, depending on the required quantity, the end of the tube must be immersed into the tank. To avoid this, an adapter is generally used, the dispensing tip of which being situated in the region of the end of the dispensing tube. Such a device is described in the company's publication "Tubusil", May/June 1983, pages 4-5. In the prior art, the device is usually arranged on a wheeled vehicle so that it is always accessible to the operator of the vehicle. However, in some cases it is not possible to arrange the vehicle near the 82157476af
