The first example of a PIC implementation in MobaXterm! Discussed in the most recent Xidax & ATXT podcast: The basic idea of the PIC instruction is quite easy to understand, but for a lot of people there are several things that can be confusing, so it's something that is easy to get wrong. In the MobaXterm PIC, we have chosen to use the smallest PIC that supports all of the instruction set features we require. There are many other PICs available on the market that offer substantially more features than what is needed for our application. However, for the testing that we've done so far, we've been able to get away with the tiny PIC and it has proved to be sufficient for our needs. In the MobaXterm PIC, there are a number of new features that you may not have been used to in previous PICs. Most PICs contain a static field of the address of the ROM that contains the
